

ENGINEERINGS AND CONTRACTORS

ENGINEERED
FOR EXCELLENCE

BUILT
WITH PRECISION

DELIVERED
WITH COMMITMENT

BUILT UNDER PRESSURE

ENGINEERING STRENGTH. DELIVERING TRUST.

ABOUT THE COMPANY

Engineering Partners for Industry

SNC Engineering and Contractors is an industrial engineering and contracting company based in the APIIC Industrial Park, Parawada, Visakhapatnam. We work across the full lifecycle of industrial infrastructure — manufacturing equipment, executing structural and piping works, applying protective treatments, and keeping plants running through dependable maintenance support.

01

Manufacturing

In-house fabrication of industrial equipment, cable trays and gratings to specification.

02

Site Execution

Structural works, piping and installation carried out by experienced crews under close supervision.

03

Protection & Care

Insulation works to extend asset life, backed by ongoing maintenance support.

One contractor, the full scope

From equipment fabrication to installation and long-term maintenance, we reduce the number of vendors a project needs — and the coordination that comes with them.

Where we work: Industrial & process plants · Manufacturing facilities · Power & utility infrastructure · Ports & industrial parks · EPC & contracting projects

WHAT WE DO

Our Services

01

Industrial Equipment Manufacturing

Fabrication of equipment built to specification, from design coordination through to finished, site-ready assemblies.

02

Structural Steel Works

Fabrication and erection of structural steelwork for buildings, platforms, pipe racks and support frames.

03

Piping Systems & Installation

Process and utility piping fabrication and installation, engineered for accurate routing and reliability.

04

Insulation Works

Thermal and protective insulation for piping and equipment to reduce heat loss and protect assets.

05

Cable Trays

Manufacture and supply of cable trays for safe, organised electrical infrastructure.

06

Gratings

Steel gratings fabricated for walkways, platforms and drainage covers across industrial sites.

07

Maintenance Services

Ongoing plant and equipment maintenance to minimise downtime and keep operations running smoothly.

WHY WORK WITH US

Built for Industrial Reliability

01 Single-Point Execution

Manufacturing, site works and maintenance under one contractor, so scope doesn't fall between vendors.

02 Practical Engineering

Solutions matched to real site conditions and constraints, not just paper specifications.

03 Quality Fabrication

Equipment, gratings and cable trays fabricated in-house to consistent standards.

04 Long-Term Support

Maintenance services that keep plant and equipment running well after installation.

HOW WE WORK

One Team, Start to Finish

One number to call, one team accountable — from the first site visit to the last maintenance round, we stay involved so nothing gets lost between stages.

1

Site Assessment

Understand requirements

2

Engineering

Plan the approach

3

Fabrication

Manufacture materials

4

Installation

Execute site works

5

Maintenance

Ongoing support

OUR WORK — CAPABILITIES IN ACTION
